

AMENDMENT TO THE CLAIMS

1. (Currently amended) A method of storing an animal food, cat litter, or animal bedding the method comprising:
providing a container wherein the container includes a top wall, bottom wall and sidewall
and wherein the sidewall is flexible and is in a collapsed state;
distending the sidewall to a substantially taut position, the sidewall being supported by a
spring disposed therein;
storing animal feed within the distended container; ~~and~~
providing a removable moisture barrier within the container; and
removing the moisture barrier intact when the moisture barrier needs to be cleaned.
2. (Original) The method of claim 1 and further comprising:
placing the container after being emptied of animal feed back into a collapsed state.
3. (Original) The method of claim 2 wherein the container is collapsed by pressing down
on the sidewall against the spring force.
4. (Original) The method of claim 2 wherein the container is retained in the collapsed
state by a fastening mechanism attached to an edge of the bottom wall and to a top edge of the
sidewall.
5. (Currently amended) A method of storing animal feed wherein different feed
formulations are fed to a plurality of animals, the method comprising:
providing a plurality of containers wherein the containers each include a top wall, bottom
wall and sidewall wherein the sidewall is flexible and in a collapsed state;
distending the sidewall to a substantially taut position wherein the sidewall is supported by
a spring disposed therein;
placing animal feed within the distended container; ~~and~~
providing a removable moisture barrier within the container; and

removing the moisture barrier intact when the moisture barrier needs to be cleaned.

6. (Original) The method of claim 5 and further comprising:
feeding the animals the animal feed; and
placing the containers which are emptied of feed back into the collapsed position.
7. (Original) The method of claim 6 wherein the containers are placed in the collapsed position by pressing down on the sidewall against the spring force and engaging a mechanism to hold the containers in a collapsed state for storage until the containers are needed to feed the animals once again.
8. (Previously Presented) The method of claim 6 and storing the containers wherein the containers are retained in the collapsed state by a fastening mechanism attached to an edge of the bottom wall and to a top edge of the sidewall.
9. (Previously Presented) The method of claim 1 wherein the moisture barrier is removably attached by a hook and loop fastener system.
10. (Previously Presented) The method of claim 1 and securing the top to the sidewall using a zipper.
11. (Previously Presented) The method of claim 5 wherein the moisture barrier is removably attached by a hook and loop fastener system.
12. (Previously Presented) The method of claim 5 and securing the top to the sidewall using a zipper.
